

Flint Creek Plant

Notice of Assessment Monitoring Program Establishment

Landfill

On January 3, 2018, it was determined that Flint Creek Plant's Landfill had a statistically significant increase over background for Boron. An alternative source demonstration was not successful within the 90 day period as allowed for in 257.94(e)(2) prompting the initiation of an assessment monitoring program, which was established on April 3, 2018. Therefore this notice is being placed in the operating record in accordance with the requirement of 257.94(e)(3).
