Date

Purpose

The “Hazardous and Solid Waste Management System: Disposal of Coal Combustion Residuals From Electric Utilities; Legacy CCR Surface Impoundments”, 89 Fed. Reg. 38950 (May 8, 2024) (amending 40 C.F.R. §257) requires owners and operators of inactive electric generating facilities to prepare documentation on the applicability of the rule for each legacy CCR surface impoundment at the facility. Franklin Realty is the owner of the Kammer Site, which has been inactive since May 2015. The Boiler Slag Pond (BSP) was believed to have been closed by a third party so a notice of intent to certify closure was placed in the site operating record on 11/4/2024. Field investigation occurred throughout 2025 and confirmed that CCR remains within the BSP area and is subject to the legacy surface impoundment requirements of the rule. The investigation was concluded on 12/4/2025. Therefore, per 40 CFR 257.100(h)(2)(ii), the applicability report is due six (6) months after this date.

Required Information

257.100(f)(1)(i)(A) The name and address of the person(s) owning and operating the legacy CCR surface impoundment with their business phone number and email address.

- Franklin Realty
Attn: Gary Spitznogle
1 Riverside Plaza
Columbus, OH 43215
phone: 614-716-1774
email: aepccrhelp@aep.com

257.100(f)(1)(i)(B) The name associated with the legacy CCR surface impoundment

- Boiler Slag Pond

257.100(f)(1)(i)(C) Information to identify the legacy CCR surface impoundment, including a figure of the facility and where the unit is located at the facility, facility address, and the latitude and longitude of the facility.

- The longitude and latitude of the facility are: 80° 49' 10" W; 39° 50' 45" N.
- The facility address is: 7897 Energy Road, Moundsville, WV, 26041.
- Figure 1 shows the location of the Boiler Slag Pond at the facility.

257.100(f)(1)(i)(D) The identification number of the legacy CCR surface impoundment if one has been assigned by the state.

- No identification number has been assigned by the state.

257.100(f)(1)(i)(E) A description of the current site conditions, including the current use of the inactive facility.

Generating Facility	Kammer Plant
In Service Date	1958
Retirement Date	May 2015
Approximate Size of Facility	51 acres
Current Condition of SI Site	<p>A notice of intent to certify closure was completed on 11/4/2024.</p> <p>A field investigation was completed and identified some ash still remains within the Boiler Slag Pond Area.</p> <p>The boiler slag pond is approximately 2 acres in size.</p> <p>The boiler slag pond is incised.</p> <p>The site currently is partially vegetated and partially graveled.</p> <p>The closest water body is the Ohio River.</p>
