**RE: Notice of Planned Participation - Annual Progress Report (2025)
Welsh Power Plant (Welsh); TPDES Permit No. 01811
Southwestern Electric Power Company (SWEPCO)
dba American Electric Power (AEP)**

Dear Mr. Kennington:

Southwestern Electric Power Company (SWEPCO) hereby submits this Notice of Planned Participation (NOPP) Annual Progress Report for the Welsh Power Plant as required by 40 CFR 423.19(g)(3). This report details the completion of interim milestones listed in the NOPP, provides a narrative discussion of all completed, missed, or delayed milestones, and includes updated milestones.

In accordance with 40 CFR 257.103(f)(2)(viii), SWEPCO submitted an application for a site-specific alternative to initiation of closure with the intention to permanently cease use of coal-fired boilers. The submission was placed in Welsh's operating record and posted to the CCR Rule Compliance Data and Information website. This document provides supporting documentation of the intent to cease combustion of coal no later than December 31, 2028. The submission also anticipated that SWEPCO would cease coal combustion by March 31, 2028, in order to meet the CCR Rule pond closure deadline of October 17, 2028; however, the actual date by which coal combustion will cease may vary, as long as the plant meets the CCR Rule deadline of October 17, 2028. U.S. EPA deemed the submission complete on January 11, 2022, but to date, has taken no further action on the pending demonstration application. SWEPCO intends to achieve the cessation of coal combustion by consuming all usable coal located on-site and converting both units to be fueled solely by natural gas.

Pursuant to 40 CFR 423.19(g)(4)(iii), AEP/SWEPCO will make the appropriate filings to the Southwest Power Pool detailing its future intentions for the facility by December 31, 2028.

Interim Milestones	Completed/ Missed/ Delayed?	Narrative Discussion	Updated Milestone (if applicable)
Cessation of coal combustion by March 31, 2028	In progress and on schedule	As part of its CCR compliance program, SWEPCO submitted an application for a site-specific alternative for initiation of closure due to permanent cessation of a coal-fired boiler, which remains pending. It is still anticipated that SWEPCO will cease coal combustion by March 31, 2028, in order to meet the CCR rule pond closure deadline of October 17, 2028 for the Primary Bottom Ash Pond.	No further updates at this time.
CCR pond closure by October 17, 2028	In progress and on schedule	The facility has two CCR units that will be closed in accordance with the CCR Rule: the Primary Bottom Ash Pond and the Bottom Ash Storage Pond. Closure of both ponds is scheduled to be completed on or before October 17, 2028.	After both units have ceased coal combustion and all other wastewater discharges are eliminated to Bottom Ash Storage Pond, the facility will initiate closure. The closure is scheduled to be completed by October 17, 2028.

SWEPCO does not waive, and expressly reserves, all rights or options available to it pursuant to 40 CFR Part 423.18 (regarding qualifying events), any updates/revisions to 40 CFR 423, or any other provision of state or federal law that may apply.

This Annual Progress Report also serves as SWEPCO's compliance action to meet Welsh's TPDES, Other Requirements, 13 provision, which requires Welsh to either commit to permanent cessation of coal by December 31, 2028, or continue coal combustion beyond December 31, 2028.

"I certify under penalty of law that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gather and evaluate the information submitted. Based on my inquiry of the person or persons who manage the system, or those persons directly responsible for gathering the information, the information submitted is, to the best of my knowledge and belief: true, accurate, and complete. I am aware that there are

significant penalties for submitting false information, including the possibility of fine and imprisonment for knowing violations."

Thank you for your attention to the aforementioned details. If you need additional information or have any questions regarding this request, please contact Emily Veteto at 214-777-1373 or via email at emmatlock@aep.com.

Sincerely,

Aimee R. Toole
Director, Environmental
American Electric Power
